POLYMARIA · TOOL GUIDE

Evaluation Evidence Recorder

Script · MetaTrader 4 · MQL source code included

About this tool

Evaluation Evidence Recorder is a script for MetaTrader 4. It has 6 settings, such as File prefix, Use common folder and Magic filter. MQL source code included.

Files in the download: EvaluationEvidenceRecorder.ex4, EvaluationEvidenceRecorder.mq4, EvaluationEvidenceRecorder.txt.

Settings (6)

These are the inputs you see when you attach the tool to a chart. Defaults are the values in the code.

Setting	Default	What it does
File prefix (InpFilePrefix)	EvidenceLog_	Log file name prefix; account number and date are appended
Use common folder (InpUseCommonFolder)	false	true = write to MQL4\Files\Common (visible to every terminal on this machine)
Magic filter (InpMagicFilter)	-1	Only record orders with this magic number, -1 = every magic number
Daily loss alert percent (InpDailyLossAlertPercent)	5.0	Log an event when the day's floating+closed loss reaches this percent of day-start balance
Snapshot interval minutes (InpSnapshotIntervalMinutes)	30	Minutes between routine balance/equity snapshot rows, 0 disables
Log connectivity (InpLogConnectivity)	true	Log IsConnected() transitions

How to install

1. Download the ZIP from your PolyMaria library and unzip it.
2. In MetaTrader 4 open File -> Open Data Folder, then go to MQL4 -> Scripts.
3. Copy the .mq4 file(s) there. Put any .mqh files in MQL4 -> Include.
4. Open the .mq4 file in MetaEditor and press Compile (F7) if MetaTrader does not show it.
5. Drag the script onto a chart to run it once.

Good to know

- Test every expert advisor on a demo account or in the Strategy Tester before trading real money.
