Order Error Code Decoder

Expert advisor (trading robot) · MetaTrader 4 · MQL source code included

About this tool

Order Error Code Decoder is an expert advisor (trading robot) for MetaTrader 4. It has 3 settings, such as Run self test, Self test every min and Magic number. MQL source code included.

Files in the download: OrderErrorCodeDecoder.ex4, OrderErrorCodeDecoder.mq4, OrderErrorCodeDecoder.txt.

Trading robots can lose money. Check every setting and test on a demo account before using real funds.

Settings (3)

These are the inputs you see when you attach the tool to a chart. Defaults are the values in the code.

Setting	Default	What it does
Run self test (InpRunSelfTest)	false	Send two deliberately invalid test requests to demonstrate live decoding (never fills - see header)
Self test every min (InpSelfTestEveryMin)	5	Minutes between self test cycles while armed
Magic number (InpMagicNumber)	20261210	Magic number used only by the self test's requests

How to install

1. Download the ZIP from your PolyMaria library and unzip it.
2. In MetaTrader 4 open File -> Open Data Folder, then go to MQL4 -> Experts.
3. Copy the .mq4 file(s) there. Put any .mqh files in MQL4 -> Include.
4. Open the .mq4 file in MetaEditor and press Compile (F7) if MetaTrader does not show it.
5. Drag the expert advisor from the Navigator onto a chart, check the settings, allow Algo/Auto Trading and press OK.
6. Test it first on a demo account or in the Strategy Tester.

Good to know

- Test every expert advisor on a demo account or in the Strategy Tester before trading real money.
- Past results of any tool do not guarantee future results. Trading involves risk.
