1. About PolyMaria

PolyMaria (polymaria.net) is a home for MetaTrader traders.

You find the Maria robots, free books, the Robot Builder and the PolyMaria app there.

Every Maria product has a guide like this one and support on Telegram.

2. What Maria Telegram does

Maria Telegram sends your MetaTrader 5 account to your phone.

It only reads the account. It never opens, changes or closes a trade.

Message	When
DAILY REPORT	Every day at your report time.
SCHEDULED REPORT	Every N minutes (if you turn it on).
WEEKLY SUMMARY	Friday at the report time.
MONTHLY SUMMARY	Last day of the month.
TRADE OPENED	A trade opens: price, SL, TP, risk.
TRADE CLOSED	A trade closes: result, pips, time.
DRAWDOWN ALERT	Floating loss reaches your %.
LOW MARGIN ALERT	Margin level falls below your %.
Chart picture	With reports, closes, or on /chart.

A report shows balance, equity, margin, floating P/L, drawdown, today / week / month results and open trades.

3. Installation

From the MQL5 Market

1. Buy or rent Maria Telegram on the MQL5 Market.
2. In MetaTrader 5 press Ctrl+T, open the Market tab.
3. Open Purchased and press Install.
4. The robot is now in Navigator → Expert Advisors → Market.

From a file

1. File → Open Data Folder.
2. Copy Maria Telegram.ex5 into MQL5 → Experts.
3. Navigator → right-click Expert Advisors → Refresh.

Allow Telegram (required)

1. Tools → Options → Expert Advisors.
2. Tick "Allow WebRequest for listed URL".
3. Add **https://api.telegram.org** and click OK.

> **IMPORTANT** Without this address nothing is sent (error 4014). Messages wait and go out after you add it.

4. Quick start (5 steps)

1. In Telegram open **@BotFather**, send /newbot and copy the **bot token**.
2. Open your new bot and press **Start**.
3. Find your **chat ID**: your user ID, a group ID (-100...) or @channel.
4. Drag Maria Telegram onto any chart. Paste the token and chat ID. Click OK.
5. Press **SEND TEST** on the panel. "TEST OK" arrives in Telegram.

Chat type	What to do
Private chat	Press Start in your bot once.
Group	Add the bot to the group.
Channel	Add the bot as an admin.

> **TIP** Token and chat ID are saved encrypted on this PC. Next time leave both empty. Type "-" to forget them.

5. Panel and commands

The panel sits in the top-left corner. Drag the header to move it. "-" / "+" folds it.

BOT

Row	Meaning
Status	Ready = all good. Not configured = token or chat ID missing. Paused = wrong token or chat ID (fix, then SEND TEST). Standby = another chart sends.
Queue	Messages waiting to be sent.
Last sent	Time of the last message (PC time).
Next report	Time and type of the next report.
Commands	On = chat commands work.

ACCOUNT

Row	Meaning
Today closed P/L	Result of trades closed today.
Floating P/L	Profit or loss of open trades.
Drawdown float / max	Open loss in % / biggest drop in history.
Equity	Account equity now.

Buttons

Button	What it does
SEND STATS	Sends the full report now.
SEND CHART	Sends a picture of this chart.
POSITIONS	Sends the open trades.
SEND TEST	Sends "TEST OK". Also restarts sending after a pause.

Telegram commands

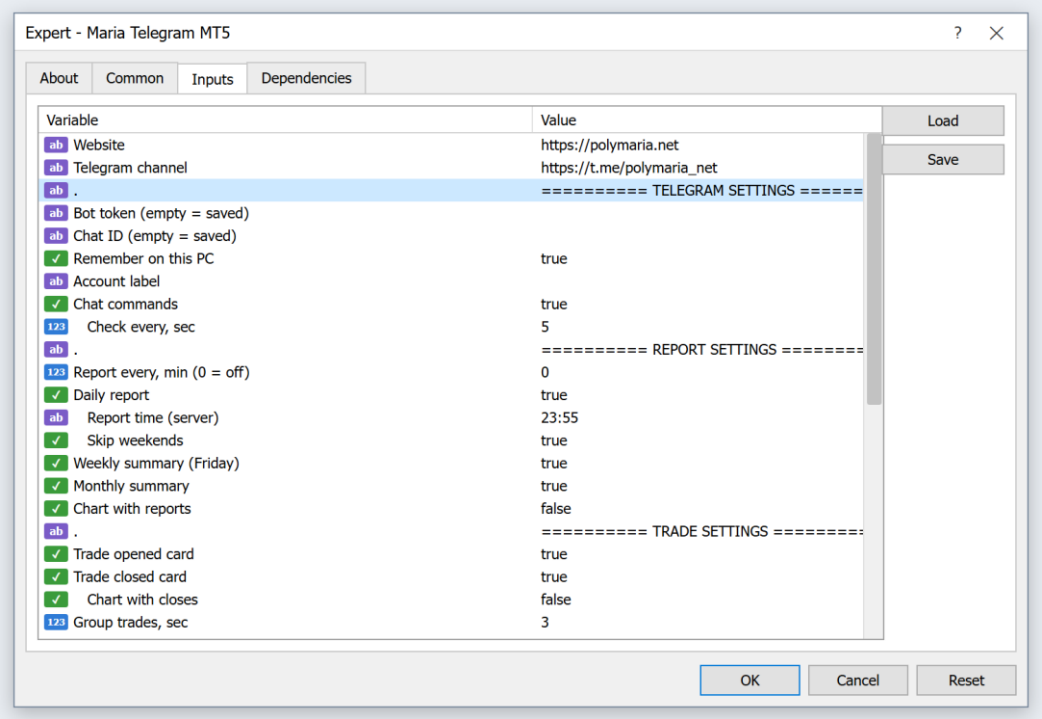

Command	What you get
/stats	Full account report.
/chart	Picture of the robot's chart.
/chart EURUSD H1	Any symbol and timeframe. Also /chart H4, /chart GOLD M15, /chart eurusd.
/positions	Open trades.
/today	Trades closed today.
/help	List of commands.

Only your chat ID gets answers. Commands older than 3 minutes are skipped.

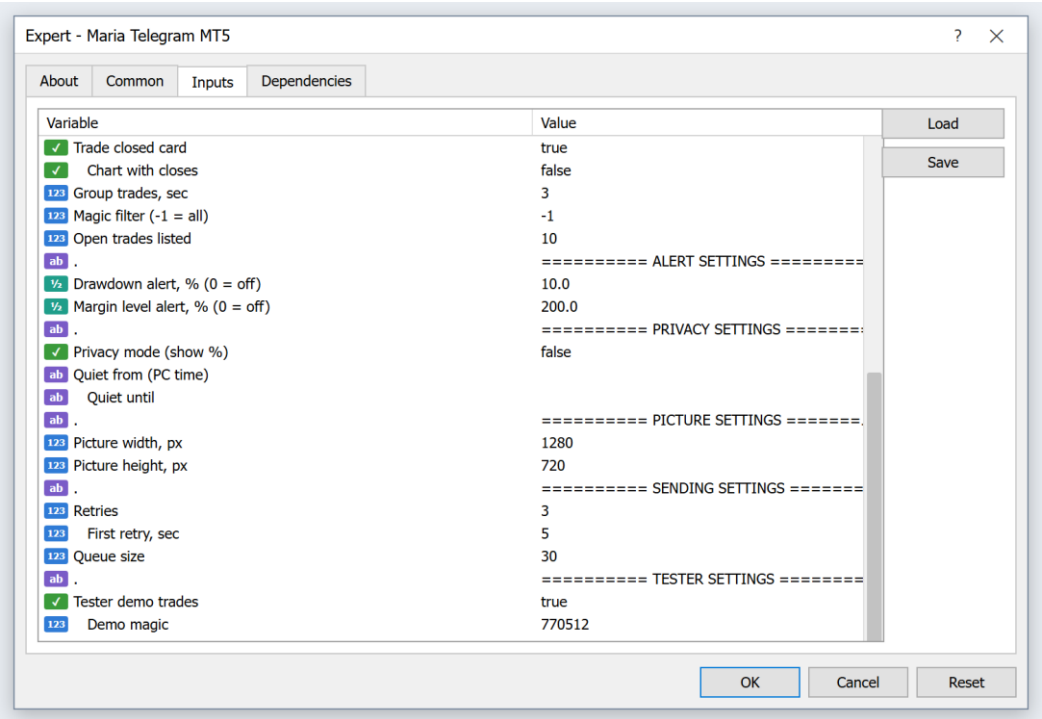

> **TIP** /chart uses an open chart with your indicators. If none is open, the robot opens one for a few seconds.

6. Settings

Press F7 on the chart to open the inputs.

7. Good to know

Topic	Answer
How many copies?	One copy on any chart covers the whole account.
Copy on two charts?	Only one sends. The other shows "Standby".
Own bot	Give Maria Telegram its own bot. Two programs on one bot steal commands.
Public channel	Turn on Privacy mode. Results show in %.
Grids and baskets	Trades at the same moment come in one message.
Report time	Broker server time (chart time).
Quiet hours	Your PC time.
Alerts	Always ring, also in quiet hours.
MT5 restart	Restart within 3 hours after the report time: the report is sent "late".
Statistics	From the full history of the server. A partial close gets its card when the position is fully closed.

8. Problems and fixes

Problem	Fix
Not configured	Enter bot token and chat ID.
Error 4014 / "Allow https://api.telegram.org"	Add the address in Tools → Options → Expert Advisors.
Error 5203 / no connection	Check internet, firewall or VPN.
Paused: "Unauthorized"	Wrong token. Copy it again, press SEND TEST.
Paused: "chat not found"	Wrong chat ID, or the bot is not in the chat. Fix it, press SEND TEST.
"Off: webhook / other app"	Another program uses this bot. Make a new bot.
No answer to commands	Command must come from your chat ID. "Chat commands" = true.
/chart: "Symbol not found"	Use the name from Market Watch, e.g. /chart EURUSD.m H1.
"chart screenshot was not ready"	Do not minimise the chart window.
Numbers incomplete after login	History is still loading. Wait a minute.
Algo Trading is off	Fine: the robot does not trade.
Nothing sent in the tester	Normal. The tester blocks web requests.

Where to look: the panel lines, then the Experts tab (Toolbox window).

9. Risk warning

Trading with leverage is risky. You can lose money.

Maria Telegram only reports. It does not trade and does not give advice.

Alerts need your PC, MetaTrader 5, the internet and Telegram to work. Do not use them as your only risk control.

Past results do not promise future results.

10. Support

Write to us on Telegram. Send a picture of the panel and of the Experts tab.
